PERSONAL PROJECTS

Predicting Heart Disease: A Data-Driven Case Study
- A case study using the UCI Heart Disease Dataset to identify key cardiovascular risk factors—even in asymptomatic patients. Leveraging Python, Pandas, NumPy, Matplotlib, and Seaborn for data cleaning, analysis, and visualization, this project highlights the value of early detection through feature-driven insights.

LinkedIn Job Market Analysis (Data Analyst Role Focus)
- Analyzed real-world LinkedIn job data to uncover trends in data analytics and tech roles. Explored demand by role, location, company, work type, and application patterns over time. Delivered interactive dashboards and insights to help job seekers target opportunities effectively in today's market.

SQL-Powered Grocery Automation: Streamlining Sales and Inventory
- A MySQL-based system to manage products, customers, sales, and inventory for grocery retailers. Features stored procedures for dynamic queries, triggers for audit trails, and tools for generating sales reports. Demonstrates real-world SQL use for efficient operations and data-driven decision-making.
